Art Unit: 3764

Claims 2, 4, 6, 7, 8, 9, and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 11-20 are allowed.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nethery in view of Barbeau.

Nethery discloses a device comprising a handle defined by a pair of ends, end cap assemblies 30 wheels (14) said wheels having a central bore upon which said wheel rolls around or about said handle and means (460) which will act as friction creating means.

As to the device including a circular outer periphery the examiner notes that it would have been obvious to one of ordinary skill in the art to include hands such as band (30) of Barbeau's for the purpose of limiting skidding of the device.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note the overall device of Alzibu and the device of Jowett. Note the braking mechanism of Lind Fig. 2 and Young Fig. 4.
